

 **SBX IP 320™**

SBX IP – Converged Telephone System

More than a phone system, SBX IP can improve operations, intra-company communications, and processes. It's not rocket science, really. When you communicate more intelligently, you impact your bottom line.

With SBX IP you get support for traditional endpoints, IP endpoints and trunking in a single system. Which means you can deploy VOIP immediately or migrate at your own pace - all at a price small businesses can afford. Easy to install, easy to manage, easy to use. *That's VOIP made simple.*
