

Protegé®

Digital Hybrid Key System

Protegé® . . . The Business Solution with Vision

A Perfect Fit

Features Save Time

Communicating is Key

Communicating is Key to Business

Your phone system is the heart of your communications and the core of your business operation. It must equip you with capabilities to excel. Based on a proven fully digital architecture, Protegé uses technology to propel your business to new levels of productivity, efficiency, flexibility, dependability, and profitability.

Combining the Best of Technology

Through implementation of an industry standard Microsoft TAPI Interface, Protegé uses both voice and data to make information access and communication quick and easy. The combination of Protegé with other TAPI compliant software applications delivers advanced solutions to help your business succeed.

A Perfect Fit . . .for Now, for Later

The Protegé family includes two cabinet sizes to meet your needs: LTX for mid-to-large size businesses and the CTX, a small system with big-system features. Protegé is designed to give you maximum flexibility within each cabinet, and allows easy expansion to meet tomorrow's needs.

Protegé Features Save You Time and Money

- *Answering Machine Emulation* lets employee screen calls that are forwarded to voice mail.
- *Conversation Record* allows employees to record conversations for future reference and review.
- *Directory Dialing* makes dialing easy.
- *Headset Jack* gives the no-hands freedom of a speakerphone with the privacy of a headset.
- *Simultaneous Call* option lets executive and data keyset users make or receive an intercom call using the speakerphone while active on a headset call.
- *Caller ID* with 'screen pops' provides additional information to employees prior to answering incoming calls to enable them to most effectively and efficiently handle callers.

Protegé Enhances Profits

- *Least Cost Routing* helps you minimize long-distance charges.
- *Call Records* help you track call activity and manage the cost of your business communications.
- *T1 Connectivity* gives you a digital connection to your service provider and can also allow multiple remote systems to communicate cost-effectively.
- *Built-In Battery Back-Up* protects your investment against power failures.
- *Call Management* streamlines call centers with features such as Agent Wrap-up, Supervisor Monitor, Supervisor Controlled Routing and Agent Help.

Protegé Makes You More Flexible and Productive

- *Easy-to-read* telephone displays with interactive "soft" feature keys make operation simple.
- *Automated Attendant* routes calls quickly, efficiently.
- *Call Forwarding* gives your employees mobility when they need it.
- *Voice Mail Integration* lets you add voice mail when you're ready.
